Computer Graphics: From Pixels to Programmable Graphics Hardware (Chapman & Hall/CRC Computer Graphics, Geometric Modeling, and Animation Series) By Alexey Borekov, Evgeniy Shikin

Complete Coverage of the Current Practice of Computer Graphics

Computer Graphics: From Pixels to Programmable Graphics Hardware explores all major areas of modern computer graphics, starting from basic mathematics and algorithms and concluding with OpenGL and real-time graphics. It gives students a firm foundation in today's high-performance graphics.

Up-to-Date Techniques, Algorithms, and API

The book includes mathematical background on vectors and matrices as well as quaternions, splines, curves, and surfaces. It presents geometrical algorithms in 2D and 3D for spatial data structures using large data sets. Although the book is mainly based on OpenGL 3.3, it also covers tessellation in OpenGL 4.0, contains an overview of OpenGL ES 2.0, and discusses the new WebGL, which allows students to use OpenGL with shaders directly in their browser. In addition, the authors describe a variety of special effects, including procedural modeling and texturing, fractals, and non-photorealistic rendering. They also explain the fundamentals of the dominant language (OpenCL) and platform (CUDA) of GPGPUs.

Web Resource

On the book's CRC Press web page, students can download many ready-to-use examples of C++ code demonstrating various effects. C++ wrappers for basic OpenGL entities, such as textures and programs, are also provided.

In-Depth Guidance on a Programmable Graphics Pipeline

Requiring only basic knowledge of analytic geometry, linear algebra, and C++, this text guides students through the OpenGL pipeline. Using one consistent example, it leads them step by step from simple rendering to animation to lighting and bumpmapping.

Editorial Review

Users Review

From reader reviews:

Hayden Roberts:

What do you in relation to book? It is not important with you? Or just adding material when you need something to explain what yours problem? How about your time? Or are you busy man or woman? If you don't have spare time to complete others business, it is gives you the sense of being bored faster. And you have spare time? What did you do? All people has many questions above. They need to answer that question due to the fact just their can do that. It said that about guide. Book is familiar on every person. Yes, it is proper. Because start from on kindergarten until university need this specific Computer Graphics: From Pixels to Programmable Graphics Hardware (Chapman & Hall/CRC Computer Graphics, Geometric Modeling, and Animation Series) to read.

Virginia Combs:

This book untitled Computer Graphics: From Pixels to Programmable Graphics Hardware (Chapman & Hall/CRC Computer Graphics, Geometric Modeling, and Animation Series) to be one of several books that will best seller in this year, honestly, that is because when you read this publication you can get a lot of benefit on it. You will easily to buy this specific book in the book retail outlet or you can order it through online. The publisher of this book sells the e-book too. It makes you more easily to read this book, because you can read this book in your Cell phone. So there is no reason to your account to past this e-book from your list.

Craig Chivers:

Many people spending their moment by playing outside having friends, fun activity together with family or just watching TV the entire day. You can have new activity to enjoy your whole day by looking at a book. Ugh, ya think reading a book can actually hard because you have to take the book everywhere? It all right you can have the e-book, getting everywhere you want in your Smart phone. Like Computer Graphics: From Pixels to Programmable Graphics Hardware (Chapman & Hall/CRC Computer Graphics, Geometric Modeling, and Animation Series) which is having the e-book version. So , try out this book? Let's view.

Mildred Brummett:

A number of people said that they feel bored stiff when they reading a guide. They are directly felt this when they get a half areas of the book. You can choose typically the book Computer Graphics: From Pixels to

Programmable Graphics Hardware (Chapman & Hall/CRC Computer Graphics, Geometric Modeling, and Animation Series) to make your current reading is interesting. Your own personal skill of reading skill is developing when you just like reading. Try to choose straightforward book to make you enjoy to see it and mingle the opinion about book and looking at especially. It is to be initially opinion for you to like to start a book and examine it. Beside that the reserve Computer Graphics: From Pixels to Programmable Graphics Hardware (Chapman & Hall/CRC Computer Graphics, Geometric Modeling, and Animation Series) can to be your friend when you're sense alone and confuse in what must you're doing of these time.
