

Diagnosing Organizations: Methods, Models, and Processes (Applied Social Research Methods)

By Michael I. Harrison

Diagnosing Organizations: Methods, Models, and Processes (Applied Social Research Methods) By Michael I. Harrison

The **Third Edition** of the bestselling **Diagnosing Organizations** shows how consultants and applied researchers can help decision makers quickly and flexibly diagnose problems and challenges and decide how to deal with them. This thoroughly revised edition can help practitioners of diagnosis directly address concerns that are critical to clients, rather than just provide feedback on current conditions and operations. In an authoritative yet readable fashion, author Michael I. Harrison presents updated treatments of the uses of diagnosis, evaluating organizational effectiveness, improving team performance, planning organization redesign projects, and assessing organization-environment relations and competitive strategy. Also treated are the politics of change management, professional dilemmas, and ethical issues confronting practitioners.
