Last Child in the Woods: Saving Our Children From Nature-Deficit Disorder By Richard Louv

"I like to play indoors better 'cause that's where all the electrical outlets are," reports a fourth-grader. Never before in history have children been so plugged in- and so out of touch with the natural world. In this groundbreaking new work, child advocacy expert Richard Louv directly links the lack of nature in the lives of today's wired generation- he calls it nature deficit- to some of the most disturbing childhood trends, such as rises in obesity, Attention Deficit Disorder (Add), and depression. Some startling facts: By the 1990s the radius around the home where children were allowed to roam on their own had shrunk to a ninth of what it had been in 1970. Today, average eight-year-olds are better able to identify cartoon characters than native species, such as beetles and oak trees, in their own community. The rate at which doctors prescribe antidepressants to children has doubled in the last five years, and recent studies show that too much computer use spells trouble for the developing mind. Nature-deficit disorder is not a medical condition; it is a description of the human costs of alienation from nature. This alienation damages children and shapes adults, families, and communities. There are solutions, though, and they're right in our own backyards. Last child in the Woods is the first book to bring together cutting-edge research showing that direct exposure to nature is essential for healthy childhood development-physical, emotional, and spiritual. What's more, nature is a potent therapy for depression, obesity, and Add. Environment-based education dramatically improves standardized test scores and grade point averages and develops skills in problem solving, critical thinking, and decision making. Even creativity is stimulated by childhood experiences in nature.

Editorial Review

Review

From Publishers Weekly

Today's kids are increasingly disconnected from the natural world, says child advocacy expert Louv (*Childhood's Future*; *Fatherlove*; etc.), even as research shows that "thoughtful exposure of youngsters to nature can... be a powerful form of therapy for attention-deficit disorder and other maladies." Instead of passing summer months hiking, swimming and telling stories around the campfire, children these days are more likely to attend computer camps or weight-loss camps: as a result, Louv says, they've come to think of nature as more of an abstraction than a reality. Indeed, a 2002 British study reported that eight-year-olds could identify Pokémon characters far more easily than they could name "otter, beetle, and oak tree." Gathering thoughts from parents, teachers, researchers, environmentalists and other concerned parties, Louv argues for a return to an awareness of and appreciation for the natural world. Not only can nature teach kids science and nurture their creativity, he says, nature needs its children: where else will its future stewards come from? Louv's book is a call to action, full of warnings—but also full of ideas for change. *Agent, James Levine. (May 20)*

From Scientific American

Unstructured outdoor play was standard for me as a hyperactive child growing up in the rural Midwest. I fondly recall digging forts, climbing trees and catching frogs without concern for kidnappers or West Nile virus. According to newspaper columnist and child advocate Richard Louv, such carefree days are gone for America's youth. Boys and girls now live a "denatured childhood," Louv writes in *Last Child in the Woods*. He cites multiple causes for why children spend less time outdoors and why they have less access to nature: our growing addiction to electronic media, the relinquishment of green spaces to development, parents' exaggerated fears of natural and human predators, and the threat of lawsuits and vandalism that has prompted community officials to forbid access to their land. Drawing on personal experience and the perspectives of urban planners, educators, naturalists and psychologists, Louv links children's alienation from nature to attention-deficit hyperactivity disorder, stress, depression and anxiety disorders, not to mention childhood obesity. The connections seem tenuous at times, but it is hard not to agree with him based on the acres of anecdotal evidence that he presents. According to Louv, the replacement of open meadows, woods and wetlands by manicured lawns, golf courses and housing developments has led children away from the natural world. What little time they spend outside is on designer playgrounds or fenced yards and is structured, safe and isolating. Such antiseptic spaces provide little opportunity for exploration, imagination or peaceful contemplation. Louv's idea is not new. Theodore Roosevelt saw a prophylactic dose of nature as a counter to mounting urban malaise in the early 20th century, and others since have expanded on the theme. What Louv adds is a focus on the restorative qualities of nature for children. He recommends that we reacquaint our children and ourselves with nature through hiking, fishing, bird-watching and disorganized, creative play. By doing so, he argues, we may lessen the frequency and severity of emotional and mental ailments and come to recognize the importance of preserving nature. At times Louv seems to conflate physical activity (a game of freeze tag) with nature play (building a tree fort), and it is hard to know which benefits children most. This confusion may be caused by a deficiency in our larger understanding of the role nature plays in a child's

development. At Louv's prompting, perhaps we will see further inquiry into this matter. In the meantime, parents, educators, therapists and city officials can benefit from taking seriously Louv's call for a "nature-child reunion."

Jeanne Hamming

"[The] national movement to 'leave no child inside' . . . has been the focus of Capitol Hill hearings, state legislative action, grass-roots projects, a U.S. Forest Service initiative to get more children into the woods and a national effort to promote a 'green hour' in each day. . . . The increased activism has been partly inspired by a best-selling book, *Last Child in the Woods*, and its author, Richard Louv." —*The Washington Post*

"*Last Child in the Woods*, which describes a generation so plugged into electronic diversions that it has lost its connection to the natural world, is helping drive a movement quickly flourishing across the nation." —*The Nation's Health*

"This book is an absolute must-read for parents." —*The Boston Globe*

"An honest, well-researched and well-written book, . . . the first to give name to an undeniable problem." —*The Atlanta Journal-Constitution*

"One of the most thought-provoking, well-written books I've read in recent memory. It rivals Rachel Carson's *Silent Spring*." —*The Cincinnati Enquirer*

"Important and original. . . . As Louv so eloquently and urgently shows, our mothers were right when they told us, day after day, 'Go out and play.'" —*The Christian Science Monitor*

"*Last Child in the Woods* is the direct descendant and rightful legatee of Rachel Carson's *The Sense of Wonder*. But this is not the only thing Richard Louv has in common with Rachel Carson. There is also this: in my opinion, *Last Child in the Woods* is the most important book published since *Silent Spring*." —Robert Michael Pyle, author of *Sky Time in Gray's River*

"A single sentence explains why Louv's book is so important: 'Our children,' he writes, 'are the first generation to be raised without meaningful contact with the natural world.' This matters, and *Last Child in the Woods* makes it patently clear why and lays out a path back." —*The Ecologist*

"With this scholarly yet practical book, Louv offers solutions today for a healthier, greener tomorrow." —*Washington Post Book World*

"The simplest, most profound, and most helpful of any book I have read on the personal and historical situation of our children, and ourselves, as we move into the twenty-first century." —Thomas Berry, author of *The Dream of the Earth*

From the Back Cover

In his groundbreaking work about the staggering divide between children and the outdoors, journalist and child advocate Richard Louv directly links the absence of nature in the lives of today's wired generation to some of the most disturbing childhood trends: the rise in obesity, attention disorders, and depression. This is the first book to bring together a body of research indicating that direct exposure to nature is essential for healthy childhood development and for the physical and emotional health of children and adults. More than

just raising an alarm, Louv offers practical solutions to heal the broken bond.

About the Author

Richard Louv, recipient of the 2008 Audubon Medal, is the author of seven books, including *Last Child in the Woods* and *The Nature Principle*. The chairman of the Children & Nature Network (www.cnaturenet.org), he is also honorary cochair of the National Forum on Children and Nature. He has written for the *San Diego Union-Tribune*, the *New York Times*, the *Washington Post*, the *Christian Science Monitor*, and other newspapers and magazines. He has appeared on *The Early Show*, *Good Morning America*, *Today*, *CBS Evening News*, *NBC Nightly News*, *NPR's Morning Edition*, *Fresh Air*, *Talk of the Nation*, and many other programs. Users Review

From reader reviews:

Rosa Tarpley:

This Last Child in the Woods: Saving Our Children From Nature-Deficit Disorder book is simply not ordinary book, you have it then the world is in your hands. The benefit you obtain by reading this book will be information inside this e-book incredible fresh, you will get info which is getting deeper an individual read a lot of information you will get. This kind of Last Child in the Woods: Saving Our Children From Nature-Deficit Disorder without we realize teach the one who examining it become critical in considering and analyzing. Don't be worry Last Child in the Woods: Saving Our Children From Nature-Deficit Disorder can bring whenever you are and not make your bag space or bookshelves' become full because you can have it within your lovely laptop even mobile phone. This Last Child in the Woods: Saving Our Children From Nature-Deficit Disorder having good arrangement in word and also layout, so you will not experience uninterested in reading.

Jose Jones:

The e-book with title Last Child in the Woods: Saving Our Children From Nature-Deficit Disorder has a lot of information that you can understand it. You can get a lot of advantage after read this book. This kind of book exist new expertise the information that exist in this guide represented the condition of the world now. That is important to yo7u to know how the improvement of the world. This book will bring you within new era of the syndication. You can read the e-book on your own smart phone, so you can read it anywhere you want.

Manuel Pina:

Do you like reading a book? Confuse to looking for your favorite book? Or your book had been rare? Why so many concern for the book? But just about any people feel that they enjoy regarding reading. Some people likes looking at, not only science book but novel and Last Child in the Woods: Saving Our Children From Nature-Deficit Disorder as well as others sources were given know-how for you. After you know how the good a book, you feel need to read more and more. Science e-book was created for teacher or even students especially. Those guides are helping them to bring their knowledge. In other case, beside science e-book, any

other book likes Last Child in the Woods: Saving Our Children From Nature-Deficit Disorder to make your spare time more colorful. Many types of book like here.

Carole Arehart:

Some individuals said that they feel bored when they reading a publication. They are directly felt the item when they get a half areas of the book. You can choose the particular book Last Child in the Woods: Saving Our Children From Nature-Deficit Disorder to make your reading is interesting. Your own skill of reading proficiency is developing when you similar to reading. Try to choose basic book to make you enjoy to learn it and mingle the sensation about book and studying especially. It is to be initially opinion for you to like to open up a book and read it. Beside that the guide Last Child in the Woods: Saving Our Children From Nature-Deficit Disorder can to be your brand new friend when you're sense alone and confuse using what must you're doing of the time.
