

# Antibody Fc: Chapter 14. No Mechanism is an Island: Interactions Among Monoclonal Antibody Mechanisms of Action

By George J. Weiner

**Antibody Fc: Chapter 14. No Mechanism is an Island: Interactions Among Monoclonal Antibody Mechanisms of Action** By George J. Weiner

Monoclonal antibodies (mAbs), including rituximab, are now a mainstay in the therapy of cancer. Despite their undeniable therapeutic value, there is much we do not fully understand about the mechanisms of action responsible for their antitumor effects. These mechanisms are often studied in isolation. In this chapter, we will review the mechanisms of action of anti-cancer mAbs and discuss how they interact. The focus of this discussion will be on rituximab, but similar conclusions can be reached with other mAbs.
