Greenhouse Design and Control By Pedro Ponce, Arturo Molina, Paul Cepeda, Esther Lugo, Brian MacCleery

Agricultural production is one of the main keys to the development of healthy societies. It is anticipated that agricultural systems will increasingly have to contend with temperature, humidity and water stress in the near future. This makes the need to increase the efficiency of land and water use ever more urgent. The control and design of greenhouses allows to increase dramatically the quality of crops and extend the cultivation period year-round. A properly designed autonomous greenhouse based on hydroponics can greatly reduce the amounts of nutrients and energy expended in agricultural production.

This book deals with different types of greenhouses, materials, structures, advanced control techniques and tendencies that are needed for designing and controlling an advanced greenhouse. The control system is presented as an integral system which covers the explanation of basic and advanced concepts for a real time controller. Also, structural analysis is introduced, whereby mechanical design is regarded as a key factor. The book incorporates simulations and experimental results, and utilizes LabVIEW and ADAMS software. Finally, it provides a perspective on the present state and future of greenhouses globally.

Written in a highly accessible manner, this book will prove useful to horticulturalists, agricultural engineers, greenhouse engineers and designers. Its easy-to-absorb contents are also suitable for (under)graduate students and researchers in agricultural and electronic engineering, horticulture, crop cultivation and soft computing.

Editorial Review

Users Review

From reader reviews:

Alice Hill:

Why don't make it to become your habit? Right now, try to prepare your time to do the important take action, like looking for your favorite reserve and reading a book. Beside you can solve your problem; you can add your knowledge by the e-book entitled Greenhouse Design and Control. Try to stumble through book Greenhouse Design and Control as your buddy. It means that it can to get your friend when you experience alone and beside that of course make you smarter than in the past. Yeah, it is very fortunated for yourself. The book makes you a lot more confidence because you can know every little thing by the book. So , let's make new experience in addition to knowledge with this book.

James Sellers:

This Greenhouse Design and Control are generally reliable for you who want to be described as a successful person, why. The explanation of this Greenhouse Design and Control can be one of the great books you must have will be giving you more than just simple studying food but feed you with information that possibly will shock your prior knowledge. This book is actually handy, you can bring it everywhere and whenever your conditions in the e-book and printed ones. Beside that this Greenhouse Design and Control forcing you to have an enormous of experience such as rich vocabulary, giving you demo of critical thinking that we understand it useful in your day activity. So , let's have it and luxuriate in reading.

Donald Labelle:

This book untitled Greenhouse Design and Control to be one of several books in which best seller in this year, this is because when you read this publication you can get a lot of benefit upon it. You will easily to buy that book in the book retail outlet or you can order it by means of online. The publisher in this book sells the e-book too. It makes you quicker to read this book, because you can read this book in your Mobile phone. So there is no reason to your account to past this guide from your list.

Richard Diller:

Are you kind of stressful person, only have 10 or 15 minute in your morning to upgrading your mind expertise or thinking skill even analytical thinking? Then you are experiencing problem with the book compared to can satisfy your short space of time to read it because this time you only find book that need more time to be examine. Greenhouse Design and Control can be your answer since it can be read by an individual who have those short free time problems.
