Plant Cell Walls By Peter Albersheim, Alan Darvill, Keith Roberts, Ron Sederoff, Andrew Staehelin

Plant cell walls are complex, dynamic cellular structures essential for plant growth, development, physiology and adaptation. *Plant Cell Walls* provides an in depth and diverse view of the microanatomy, biosynthesis and molecular physiology of these cellular structures, both in the life of the plant and in their use for bioproducts and biofuels.

Plant Cell Walls is a textbook for upper-level undergraduates and graduate students, as well as a professional-level reference book. Over 400 drawings, micrographs, and photographs provide visual insight into the latest research, as well as the uses of plant cell walls in everyday life, and their applications in biotechnology. Illustrated panels concisely review research methods and tools; a list of key terms is given at the end of each chapter; and extensive references organized by concept headings provide readers with guidance for entry into plant cell wall literature.

Cell wall material is of considerable importance to the biofuel, food, timber, and pulp and paper industries as well as being a major focus of research in plant growth and sustainability that are of central interest in present day agriculture and biotechnology. The production and use of plants for biofuel and bioproducts in a time of need for responsible global carbon use requires a deep understanding of the fundamental biology of plants and their cell walls. Such an understanding will lead to improved plant processes and materials, and help provide a sustainable resource for meeting the future bioenergy and bioproduct needs of humankind.

Editorial Review

About the Author

Peter Albersheim is Emeritus Director of the Complex Carbohydrate Research Center at the University of Georgia. He received his PhD from the California Institute of Technology. He and Dr. Alan Darvill founded the CCRC in September 1985.

Alan Darvill is Director of the CCRC at the University of Georgia, Director of the Department of Energy (DOE)-funded Center for Plant and Microbial Complex Carbohydrates, and is UGA Lead in the DOE-funded BioEnergy Science Center. He received his PhD from the University College of Wales.

Keith Roberts is Emeritus Fellow at the John Innes Centre, Norwich. He received his PhD from the University of Cambridge.

Ron Sederoff is Professor of Forestry and Co-Director of the Forest Biotechnology Group at North Carolina State University. He received his PhD from the University of California, Los Angeles.

Andrew Staehelin is Emeritus Professor at the University of Colorado at Boulder. He received his PhD from the Swiss Federal Institute of Technology.

Users Review

From reader reviews:

Linda Enders:

Reading can called mind hangout, why? Because when you are reading a book specially book entitled Plant Cell Walls your head will drift away trough every dimension, wandering in every aspect that maybe unfamiliar for but surely will become your mind friends. Imaging each and every word written in a reserve then become one web form conclusion and explanation in which maybe you never get just before. The Plant Cell Walls giving you another experience more than blown away your mind but also giving you useful data for your better life within this era. So now let us demonstrate the relaxing pattern is your body and mind will probably be pleased when you are finished looking at it, like winning an activity. Do you want to try this extraordinary investing spare time activity?

Steven Stockton:

In this age globalization it is important to someone to find information. The information will make you to definitely understand the condition of the world. The condition of the world makes the information better to share. You can find a lot of references to get information example: internet, paper, book, and soon. You can

observe that now, a lot of publisher which print many kinds of book. Often the book that recommended for your requirements is Plant Cell Walls this publication consist a lot of the information of the condition of this world now. This book was represented just how can the world has grown up. The language styles that writer use for explain it is easy to understand. Often the writer made some analysis when he makes this book. That is why this book ideal all of you.

Kathleen Duff:

A lot of reserve has printed but it differs from the others. You can get it by net on social media. You can choose the very best book for you, science, comedy, novel, or whatever through searching from it. It is known as of book Plant Cell Walls. You can add your knowledge by it. Without leaving behind the printed book, it could add your knowledge and make you actually happier to read. It is most critical that, you must aware about guide. It can bring you from one destination to other place.

Roland Collins:

What is your hobby? Have you heard that will question when you got college students? We believe that that problem was given by teacher with their students. Many kinds of hobby, All people has different hobby. And also you know that little person similar to reading or as studying become their hobby. You should know that reading is very important in addition to book as to be the factor. Book is important thing to provide you knowledge, except your own teacher or lecturer. You find good news or update about something by book. Numerous books that can you choose to use be your object. One of them is this Plant Cell Walls.
