Understanding the Digital Generation: Teaching and Learning in the New Digital Landscape (21st Century Fluency) By Ian Jukes, Ted McCain, Lee Crockett

Today's world is different for our children, vastly different from the one we grew up in. The technologies we take for granted or simply don't understand have become an integral part of our children's identities. These technologies saturate practically every aspect of their daily lives. This digital bombardment is shaping who they are and who they will become. We must realize they live in a different world, and speak a different language. If we ever want to take a part in nurturing those who will be the architects of our future, it's up to us to learn that language and step into that world, to allow them to lead us in as much as we must lead them so that we may truly understand the digital generation.

Editorial Review

Review

"A highly relevant book that gives specific reasons for educators to shift to meet the needs of digital natives. This book is loaded with vignettes and cases to demonstrate how the kids of today think and learn, with strategies to help educators engage today's tech-savvy students."--Beth Madison, Principal

"Understanding the Digital Generation is grounded in the recognition that today's students are very different from those in the past, and it outlines new approaches to schooling with technology that should be heard and acted upon now."--Frank Kelly, Senior Partner, SHW Group (01/05/2010)

"The authors make a compelling case for the need to transform 20th-century classrooms into 21st-century learning environments to engage digital learners and prepare them to successfully collaborate, create, and compete in the multinational workplaces and communities of the new knowledge economy."--Janis Jensen, Director, Office of Academic Standards (01/05/2010)

"While many assume that 21st-century education merely demands access to hardware and the Internet, our greatest limit is one of pedagogical vision. Jukes, McCain, and Crockett consistently push us to re-imagine the entire premise of learning and collaboration in the future. Best of all, they know how to guide us through a strategic process that ensures our students will remain intellectually agile in a future that extends far beyond the traditional schoolhouse."--Christian Long, Educator and School Planner (01/06/2010)

"For academic advisors this book is a good resource to provide an understanding and appreciation for the digital generation of students. I recommend this book for academic advisors seeking to better improve their understanding and interactions with students of the digital generation."--Douglas A. Smith, Academic Advisor, College of Education "NACADA Journal" (05/22/2012)

"A highly relevant book that gives specific reasons for educators to shift to meet the needs of digital natives. This book is loaded with vignettes and cases to demonstrate how the kids of today think and learn, with strategies to help educators engage today's tech-savvy students."--Beth Madison, Principal (12/28/2009)"

Jukes, McCain, and Crockett provide an excellent argument of why schools are not effectively preparing our students for the 21st-century global workforce. This shift of the paradigm where students move from consumers of knowledge to creators of their knowledge is paramount to students' future successes. --Matt McClure, Superintendent (01/05/2010)"

In their new book, Jukes, McCain, and Crockett have broken new ground. While focusing on 21st-century skills, this group of authors has laid important groundwork for lifting our thinking into the 21st century. As they so aptly point out, we cannot correctly identify the skills for the 21st century with thinking still grounded in the 20th century. Jukes, McCain, and Crockett challenge our thinking first and then lead us to what is important for our students to be able to do in this new century. They are right on target for truly understanding the future of educating children. --Donna Walker Tileston, Author and International Presenter (01/05/2010)"

Jukes, McCain, and Crockett have laid out an excellent road map for learning in the 21st century. Readers will have clearer understanding of this digital generation and why our classrooms continue to teach analog

students in a digital world. --James Cisek, CEO/President (01/05/2010)"

This book dramatically documents the need for educators to recognize that 21st-century learners do not learn like their predecessors. The included research and suggested strategies for change provide hope for the future. As a former Ohio school superintendent and staff development director, I believe this is a must-read for those truly interested in educational reform. --Steve Franko, Educational Consultant (01/05/2010)"

This book explores critical questions that intrigue today's educational leaders: How do I balance the best of the past with the opportunities and realities of the present? How do I balance all that I know with all that we are becoming? And how does all this create the best possible learning environment for our students? A great guide to the future! --Nikos Theodosakis, Author, The Director in the Classroom (01/05/2010)"

The students populating today's schools are fundamentally different from those of previous generations. If we are serious about educating them for life in the 21st century, we must acknowledge this difference and rebalance our approach. In *Understanding the Digital Generation*, Jukes, McCain, and Crockett fully deliver on their goal of providing a greater understanding of the digital generation and sparking ...deep thinking about how instruction should change to teach them effectively. --Brian Celli, Superintendent/CEO (01/05/2010)"

Jukes, McCain, and Crockett offer up a highly readable, terribly important summary of the attributes of today's technologically enhanced children and explore the urgent implications for today's schools. Get this book and read it. And then pass it along to your administrators! --Doug Johnson, Director of Media and Technology (01/05/2010)"

A book that captures what real learning is all about. Thank you Ian, Ted, and Lee for sharing your knowledge and casting new insight on digital kids. A must-read for every teacher, teaching in this modern, high-tech, digital online world. This book equips teachers to meet these challenges and is the first of its kind to make a significant shift in focus from how teachers teach to how students learn. --Nicky Mohan, Developer (01/05/2010)"

About the Author

Ian Jukes has been a teacher, an administrator, writer, consultant, university instructor, and keynote speaker. He is the president of the InfoSavvy Group, an international consulting group that provides leadership and program development in the areas of assessment and evaluation, strategic alignment, curriculum design and publication, professional development, planning, change management, hardware and software acquisition, information services, customized research, media services, and online training as well as conference keynotes and workshop presentations. Over the past 10 years, Jukes has worked with clients in more than 40 countries and made more than 7,000 presentations. His Committed Sardine Blog is read by more than

100,000 people in 80 countries.

Users Review

From reader reviews:

William Tietjen:

What do you ponder on book? It is just for students as they are still students or this for all people in the world, the actual best subject for that? Just you can be answered for that query above. Every person has different personality and hobby for each and every other. Don't to be obligated someone or something that they don't need do that. You must know how great in addition to important the book Understanding the Digital Generation: Teaching and Learning in the New Digital Landscape (21st Century Fluency). All type of book could you see on many options. You can look for the internet methods or other social media.

Michael Lockwood:

Information is provisions for individuals to get better life, information these days can get by anyone with everywhere. The information can be a knowledge or any news even a huge concern. What people must be consider any time those information which is inside the former life are hard to be find than now's taking seriously which one is acceptable to believe or which one the resource are convinced. If you have the unstable resource then you buy it as your main information you will have huge disadvantage for you. All of those possibilities will not happen throughout you if you take Understanding the Digital Generation: Teaching and Learning in the New Digital Landscape (21st Century Fluency) as your daily resource information.

Clarissa Holland:

Do you really one of the book lovers? If yes, do you ever feeling doubt while you are in the book store? Make an effort to pick one book that you find out the inside because don't assess book by its handle may doesn't work the following is difficult job because you are frightened that the inside maybe not seeing that fantastic as in the outside seem likes. Maybe you answer might be Understanding the Digital Generation: Teaching and Learning in the New Digital Landscape (21st Century Fluency) why because the fantastic cover that make you consider with regards to the content will not disappoint an individual. The inside or content is definitely fantastic as the outside or maybe cover. Your reading sixth sense will directly guide you to pick up this book.

John Hayes:

What is your hobby? Have you heard which question when you got scholars? We believe that that problem was given by teacher on their students. Many kinds of hobby, Everyone has different hobby. Therefore you know that little person like reading or as reading become their hobby. You have to know that reading is very important along with book as to be the thing. Book is important thing to incorporate you knowledge, except your own teacher or lecturer. You get good news or update regarding something by book. A substantial number of sorts of books that can you take to be your object. One of them is niagra Understanding the

Digital Generation: Teaching and Learning in the New Digital Landscape (21st Century Fluency).
