By Chris Bryant

**CCNA Success: Mastering Binary Math And Subnetting** By Chris Bryant

Binary math and subnetting are the toughest topics on the CCENT and CCNA exams, and for the past eight years, I've helped candidates just like you around the world master these topics and earn their CCNA.

You'll learn the necessary skills to resolve any binary or subnetting question you're asked on the CCNA, and even better, you'll learn vital real-world skills that will help you troubleshoot IP addressing and subnetting problems on real production networks.

I'm not going to show you any tricks, or have you memorize one chart after the other. Step by step, beginning with the fundamentals, you'll learn how to solve any of the following question types quickly and efficiently:

Converting Decimals to Binary Strings

Converting Binary Strings to Decimals

Determining The Number of Valid Subnets

Determining The Number of Valid Hosts On Those Subnets

Determining The Range of Valid IP Addresses on Any Subnet

Determining The Broadcast Address of Any Subnet

Subnetting From Scratch -- YOU Perform The Subnetting!

You'll be quite surprised how easy working with binary and subnetting is when you have the clearest, easily-understood techniques you'll learn from this ebook.

Practice makes perfect, and with that in mind, this ebook contains over 150 practice questions, including illustrated answers for every question. I won't just give you the answer, I'll show you exactly how we arrived at the answer.

You also save a lot of valuable time on exam day by knowing the quick, easy methods of solving these questions, without any fumbling around or wasting time.

And to top it off, right now you get all of this for five bucks.

Join the thousands of CCNA candidates who have used my methods to quickly solve binary math and subnetting questions on their exam today!

### Editorial Review

### Users Review

#### From reader reviews:

##### William Harris:

Book is to be different per grade. Book for children until eventually adult are different content. As we know that book is very important usually. The book CCNA Success: Mastering Binary Math And Subnetting had been making you to know about other know-how and of course you can take more information. It is rather advantages for you. The guide CCNA Success: Mastering Binary Math And Subnetting is not only giving you much more new information but also to be your friend when you experience bored. You can spend your spend time to read your guide. Try to make relationship with all the book CCNA Success: Mastering Binary Math And Subnetting. You never truly feel lose out for everything should you read some books.

##### Anna Snyder:

Playing with family in a park, coming to see the ocean world or hanging out with buddies is thing that usually you will have done when you have spare time, then why you don't try issue that really opposite from that. One particular activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you have been ride on and with addition info. Even you love CCNA Success: Mastering Binary Math And Subnetting, you may enjoy both. It is great combination right, you still need to miss it? What kind of hang-out type is it? Oh seriously its mind hangout fellas. What? Still don't have it, oh come on its referred to as reading friends.

##### Bruce Herrera:

Your reading sixth sense will not betray you actually, why because this CCNA Success: Mastering Binary Math And Subnetting publication written by well-known writer who knows well how to make book that could be understand by anyone who have read the book. Written in good manner for you, leaking every ideas and writing skill only for eliminate your hunger then you still question CCNA Success: Mastering Binary Math And Subnetting as good book but not only by the cover but also by the content. This is one reserve that can break don't assess book by its handle, so do you still needing another sixth sense to pick this!? Oh come on your reading sixth sense already said so why you have to listening to another sixth sense.

##### Philip Martin:

As a university student exactly feel bored for you to reading. If their teacher requested them to go to the library in order to make summary for some reserve, they are complained. Just tiny students that has reading's spirit or real their pastime. They just do what the educator want, like asked to the library. They go to at this

time there but nothing reading seriously. Any students feel that looking at is not important, boring and also can't see colorful pictures on there. Yeah, it is being complicated. Book is very important in your case. As we know that on this period of time, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. Therefore this CCNA Success: Mastering Binary Math And Subnetting can make you sense more interested to read.
