

Post-Parametric Automation in Design and Construction

By Alfredo Andia, Thomas Spiegelhalter

Post-Parametric Automation in Design and Construction By Alfredo Andia, Thomas Spiegelhalter

Automation, a mixture of algorithms, robots, software, and avatars, is transforming all types of jobs and industries. This book responds to one critical question for the design and construction industry: “how are architects, engineers, and contractors using information technology to further automate their practices?”

Addressing the use of new digital technologies, particularly parametric automation for design and construction in the building industry, this book looks at how technologically advanced architectural and engineering practices are semi-automating their design processes by using sophisticated algorithms to transform their workflows. The book also documents a set of firms that are further advancing automation by using pre-fabrication, modularization, and custom designs via robotics.

Editorial Review

About the Author

Alfredo Andia is an associate professor in the Department of Architecture at Florida International University . He earned his Ph.D. from the College of Environmental Design at the University of California , Berkeley. Thomas Spiegelhalter is co-director of the Structures and Environmental Technologies Lab at the Department of Architecture at Florida International University and teaches Sustainability Graduate Studio and Environmental Systems in Architecture. He earned his master in design and architecture from the University of the Arts in Berlin

Users Review

From reader reviews:

Bryan Smith:

Now a day people that Living in the era exactly where everything reachable by connect with the internet and the resources within it can be true or not demand people to be aware of each information they get. How people have to be smart in having any information nowadays? Of course the solution is reading a book. Studying a book can help folks out of this uncertainty Information specially this Post-Parametric Automation in Design and Construction book because this book offers you rich details and knowledge. Of course the information in this book hundred per-cent guarantees there is no doubt in it you probably know this.

Daniel Grinder:

Do you really one of the book lovers? If yes, do you ever feeling doubt when you find yourself in the book store? Attempt to pick one book that you find out the inside because don't ascertain book by its deal with may doesn't work at this point is difficult job because you are frightened that the inside maybe not while fantastic as in the outside look likes. Maybe you answer is usually Post-Parametric Automation in Design and Construction why because the excellent cover that make you consider with regards to the content will not disappoint anyone. The inside or content is fantastic as the outside or maybe cover. Your reading sixth sense will directly assist you to pick up this book.

Jerry Melgar:

Within this era which is the greater particular person or who has ability to do something more are more treasured than other. Do you want to become among it? It is just simple approach to have that. What you must do is just spending your time little but quite enough to experience a look at some books. One of many books in the top checklist in your reading list is Post-Parametric Automation in Design and Construction. This book that is certainly qualified as The Hungry Hillside can get you closer in turning out to be precious person. By looking up and review this reserve you can get many advantages.

Matthew Sewell:

Reading a publication make you to get more knowledge from this. You can take knowledge and information from a book. Book is composed or printed or descriptive from each source this filled update of news. With this modern era like right now, many ways to get information are available for anyone. From media social such as newspaper, magazines, science e-book, encyclopedia, reference book, new and comic. You can add your understanding by that book. Ready to spend your spare time to open your book? Or just seeking the Post-Parametric Automation in Design and Construction when you required it?
