Editorial Review

About the Author

For the past two decades, Cecie Starr has been known as one of the best-selling biology textbook authors. Her texts, appreciated for their clarity in both the written word and the visual representation of biological concepts, include multiple editions of BIOLOGY: THE UNITY AND DIVERSITY OF LIFE, BIOLOGY: CONCEPTS AND APPLICATIONS, and BIOLOGY TODAY AND TOMORROW. Her original dream was to become an architect. Instead of building houses, she now builds, with care and attention to detail, incredible texts based on this philosophy: "I invite students into a chapter through an intriguing story. Once inside, they get the great windows that biologists construct on the world of life. Biology is not just another house. It is a conceptual mansion. I hope to do it justice."

Christine Evers has been creating multimedia and Web-based materials to supplement Starr and other science texts for ten years. She earned her B.S. in Biology from SUNY Stony Brook. After working as a research assistant studying the developmental biology of slime mold, she was awarded an N.S.F. fellowship to attend Yale, where she studied evolutionary biology and honeybee behavior. She has a strong interest in science education and serves as a member of her local school board.

Lisa Starr has been responsible for the incredible art in the Starr biology textbooks for many years. She has worked at as a research scientist at The Scripps Institute as well as several other institutions. Her area of expertise is biochemistry, molecular and cell biology.

Users Review

From reader reviews:

Jodie Kahl:

Book is to be different for every single grade. Book for children till adult are different content. As it is known to us that book is very important for people. The book Biology Today and Tomorrow with Physiology has been making you to know about other knowledge and of course you can take more information. It is very advantages for you. The reserve Biology Today and Tomorrow with Physiology is not only giving you far more new information but also to become your friend when you feel bored. You can spend your own spend time to read your guide. Try to make relationship with the book Biology Today and Tomorrow with Physiology.
