### Connect 1-Semester Access Card for Chemistry: The Molecular Nature of Matter and Change By Martin Silberberg, Patricia Amateis

McGraw-Hill Connect® is a subscription-based learning service accessible online through your personal computer or tablet. Choose this option if your instructor will require Connect to be used in the course. Your subscription to Connect includes the following:

- SmartBook® - an adaptive digital version of the course textbook that personalizes your reading experience based on how well you are learning the content.
- Access to your instructor's homework assignments, quizzes, syllabus, notes, reminders, and other important files for the course.
- Progress dashboards that quickly show how you are performing on your assignments and tips for improvement.
- The option to purchase (for a small fee) a print version of the book. This binder-ready, loose-leaf version includes free shipping.
- LearnSmart® Prep is a super adaptive product that quickly and efficiently prepares students for a college level course.

Complete system requirements to use Connect can be found here:

### **Editorial Review**

#### About the Author

Patricia Amateis graduated with a B.S. in Chemistry Education from Concord University in West Virginia and a PhD in Analytical Chemistry from Virginia Tech. She has been on the faculty of the Chemistry Department at Virginia Tech for 28 years, teaching General Chemistry and Analytical Chemistry. For the past 13 years, she has served as Director of General Chemistry, responsible for the oversight of both the lecture and lab portions of the large General Chemistry program. She has taught thousands of students during her career and has been awarded the University Sporn Award for Introductory Teaching, the Alumni Teaching Award, and the William E. Wine Award for a history of university teaching excellence. She and her husband live in Blacksburg, Virginia and are the parents of three adult children. In her free time, she enjoys biking, hiking, competing in the occasional sprint triathlon, and playing the double second in Panjammers, Blacksburg's steel drum band.

Martin S. Silberberg received his B.S. in chemistry from the City University of New York in 1966 and his Ph.D. in chemistry from the University of Oklahoma, in 1971. He then accepted a research position at the Albert Einstein College of Medicine, where he studied the chemical nature of neurotransmission and Parkinson's disease. In 1977, Dr. Silberberg joined the faculty of Simon's Rock College of Bard (Massachusetts), a liberal arts college known for its excellence in teaching small classes of highly motivated students. As Head of the Natural Sciences Major and Director of Premedical Studies, he taught courses in general chemistry, organic chemistry, biochemistry, and nonmajors chemistry. The close student contact afforded him insights into how students learn chemistry, where they have difficulties, and what strategies can help them succeed. In 1983, Dr. Silberberg decided to apply these insights in a broader context and established a text writing and editing company. Before writing his own text, he worked on chemistry, biochemistry, and physics texts for several major college publishers. He resides with his wife and child in Massachusetts. For relaxation, he cooks, sings, and walks in the woods.

### **Users Review**

#### **From reader reviews:**

#### **Marcus Huskins:**

Reading can called head hangout, why? Because while you are reading a book particularly book entitled Connect 1-Semester Access Card for Chemistry: The Molecular Nature of Matter and Change your thoughts will drift away trough every dimension, wandering in most aspect that maybe unfamiliar for but surely can become your mind friends. Imaging every single word written in a book then become one type conclusion and explanation this maybe you never get ahead of. The Connect 1-Semester Access Card for Chemistry: The Molecular Nature of Matter and Change giving you yet another experience more than blown away the mind but also giving you useful information for your better life on this era. So now let us present to you the relaxing pattern at this point is your body and mind will likely be pleased when you are finished looking at it, like winning a game. Do you want to try this extraordinary spending spare time activity?

**Thomas Heiden:**

Are you kind of stressful person, only have 10 or 15 minute in your day time to upgrading your mind expertise or thinking skill also analytical thinking? Then you are experiencing problem with the book as compared to can satisfy your short period of time to read it because all this time you only find publication that need more time to be read. Connect 1-Semester Access Card for Chemistry: The Molecular Nature of Matter and Change can be your answer because it can be read by an individual who have those short time problems.

**Antonio Mock:**

The book untitled Connect 1-Semester Access Card for Chemistry: The Molecular Nature of Matter and Change contain a lot of information on the idea. The writer explains her idea with easy method. The language is very simple to implement all the people, so do not necessarily worry, you can easy to read this. The book was published by famous author. The author will bring you in the new age of literary works. You can read this book because you can read on your smart phone, or product, so you can read the book within anywhere and anytime. If you want to buy the e-book, you can open their official web-site and also order it. Have a nice study.

**Harold Smith:**

Do you like reading a book? Confuse to looking for your best book? Or your book was rare? Why so many problem for the book? But just about any people feel that they enjoy regarding reading. Some people likes reading, not only science book but additionally novel and Connect 1-Semester Access Card for Chemistry: The Molecular Nature of Matter and Change as well as others sources were given expertise for you. After you know how the fantastic a book, you feel need to read more and more. Science e-book was created for teacher or maybe students especially. Those textbooks are helping them to increase their knowledge. In additional case, beside science e-book, any other book likes Connect 1-Semester Access Card for Chemistry: The Molecular Nature of Matter and Change to make your spare time more colorful. Many types of book like this.
