

Trees: A Complete Guide to Their Biology and Structure

By Roland Ennos

Trees: A Complete Guide to Their Biology and Structure By Roland Ennos

Trees are vital components of the landscape and have been exploited by humans since the beginning of our history. They cover huge areas of the globe, from the rainforests of the central tropics to the conifer forests of the subarctic, and from high up mountains right down to the seashore.

Roland Ennos allows readers to better understand trees and their structure by answering questions that include: How did trees evolve? How do they stand up? Why are there so many different types? How and why do we use them? He also explores the evolution of the first trees to the enormous diversity of tree life today. Illustrated with more than 120 stunning color images from around the world, *Trees* provides fascinating insights into the biology of these magnificent plants.
