Urologic Surgical Pathology By David G. Bostwick, Liang Cheng

With sweeping revisions throughout, the new edition of *Urologic Surgical Pathology* equips you to **accurately diagnose specimens** of the entire **urinary tract** and **male reproductive system** plus the adrenal glands. **Comprehensive** in scope, this title begins with a look at normal anatomy and histology for each organ system...followed by discussions of the pathology of congenital anomalies, inflammations, non-neoplastic diseases and neoplasia. **Practical guidance** in daily urological pathology sign-out and the latest recommended diagnostic approaches — with an emphasis on clinicopathologic and radiographic-pathologic correlations — makes this a true **diagnostic decision-making medical reference**. A consistent format enables you to locate critical information quickly, and more than 1600 high-quality illustrations — most in full color — make diagnosis even easier.

- **Consult this title on your favorite e-reader**, conduct rapid searches, and adjust font sizes for optimal readability.
- **Rely on the practice-proven experience** of today's authorities to identify and diagnose with confidence.
- **Confirm your diagnostic suspicions** by comparing your findings to more than 1600 color images and color graphics.
- **Quickly locate the specific information you need through** an abundance of tables, diagrams and flowcharts; boxed lists of types and causes of diseases; differential diagnosis; characteristic features of diseases; complications; classifications; and staging.
- **Stay current with the latest information on:** differential diagnosis for all tumor types encountered in urological surgical pathology practice; urologic tumor specimen handling and reporting guidelines; new entities and updated classification schemes; and newer immunohistochemical and genetic diagnostic methods.
- **Develop targeted therapy** specific to a particular patient's problem based on key molecular aspects of disease, especially in relevance to targeted therapy/personalized medicine.
- **Provide** the clinician with the **most accurate diagnostic and prognostic indicators**, by incorporating the latest classification and staging systems in your reports.
- **Deepen your understanding** of new diagnostic biomarkers and their utility in differential diagnosis.

Editorial Review

Review

"Pathologists who have used the previous edition will be pleased with this update and I am sure that they will welcome this new edition with élan. The eight years since the last edition have seen major advances in the field of urologic pathology and this new edition includes most if not all of them. I know of no better book that would bring readers up to speed in urologic pathology as it is practiced by the foremost experts in this subspecialty. For a rapidly developing field (like urologic pathology), this might appear no more than an ephemeral snapshot, but still it will update readers better than any other book. The morphology is still the mainstay, but the ancillary techniques like immunohistochemistry and molecular biology are also included and will help readers understand not only the biology and pathophysiology, but also the clinical significance of these new advances. The book was written for practicing surgical pathologists, who will be the main users. However it should be made available to trainees in pathology and urology and oncologists dealing with urologic diseases. Thus, I see it on the shelves of practicing pathologists as well as in general hospital libraries. I highly recommend this book as one of the must-have, must-read, key books of the core library of modern surgical pathology." **Reviewed by:** Ivan Damjanov, MD (University of Kansas Medical Center)

Doody Review: 5 stars

"A great update of a well know textbook. Uropathology colleagues find it useful". **Reviewed by:** PathLab.org, June 2014

About the Author

David G. Bostwick, M.D., MBA, is a clinical professor of pathology at the University of Virginia in Charlottesville and medical director of Bostwick Laboratories in Richmond.

E. David Crawford, M.D., is the associate director of the University of Colorado Comprehensive Cancer Center in Aurora. He is also professor of surgery and radiation oncology and head of urologic oncology at the University of Colorado Health Sciences Center in Aurora.

Celestia S. Higano, M.D., is an oncology specialist at the Seattle Cancer Care Alliance and is an associate professor of the department of medicine and the department of urology at the University of Washington School of Medicine in Seattle.

Mack Roach III, M.D., is a professor of radiation oncology and urology and director of clinical research in radiation oncology at the University of California at San Francisco.

Liang Cheng is Professor of Pathology and Urology, Director of Molecular Diagnostics and the Molecular Pathology Laboratory, Chief of the Genitourinary Pathology Division, and Director, Fellowship in Urologic Pathology at Indiana University School of Medicine, Indianapolis, IN, USA.

Users Review

From reader reviews:

Sarita Springer:

Do you have favorite book? When you have, what is your favorite's book? E-book is very important thing for
