Iris Biometric Model for Secured Network Access

By Franjieh El Khoury

Iris Biometric Model for Secured Network Access By Franjieh El Khoury

In the last few years, biometric techniques have proven their ability to provide secure access to shared resources in various domains. Furthermore, software agents and multi-agent systems (MAS) have shown their efficiency in resolving critical network problems.

Iris Biometric Model for Secured Network Access proposes a new model, the IrisCryptoAgentSystem (ICAS), which is based on a biometric method for authentication using the iris of the eyes and an asymmetric cryptography method using "Rivest-Shamir-Adleman" (RSA) in an agent-based architecture. It focuses on the development of new methods in biometric authentication in order to provide greater efficiency in the ICAS model. It also covers the pretopological aspects in the development of the indexed hierarchy to classify DRVA iris templates.

The book introduces biometric systems, cryptography, and multi-agent systems (MAS) and explains how they can be used to solve security problems in complex systems. Examining the growing interest to exploit MAS across a range of fields through the integration of various features of agents, it also explains how the intersection of biometric systems, cryptography, and MAS can apply to iris recognition for secure network access.

The book presents the various conventional methods for the localization of external and internal edges of the iris of the eye based on five simulations and details the effectiveness of each. It also improves upon existing methods for the localization of the external and internal edges of the iris and for removing the intrusive effects of the eyelids.

Editorial Review

Users Review

From reader reviews:

Paul Douglas:

Nowadays reading books become more than want or need but also become a life style. This reading practice give you lot of advantages. The benefits you got of course the knowledge the actual information inside the book that will improve your knowledge and information. The knowledge you get based on what kind of publication you read, if you want send more knowledge just go with training books but if you want truly feel happy read one having theme for entertaining including comic or novel. Typically the Iris Biometric Model for Secured Network Access is kind of guide which is giving the reader capricious experience.

Royce Britton:

Typically the book Iris Biometric Model for Secured Network Access has a lot of information on it. So when you make sure to read this book you can get a lot of profit. The book was written by the very famous author. The author makes some research ahead of write this book. This specific book very easy to read you can find the point easily after reading this article book.

Patrick Reyes:

This Iris Biometric Model for Secured Network Access is completely new way for you who has fascination to look for some information because it relief your hunger of information. Getting deeper you in it getting knowledge more you know otherwise you who still having bit of digest in reading this Iris Biometric Model for Secured Network Access can be the light food in your case because the information inside this particular book is easy to get by means of anyone. These books build itself in the form that is certainly reachable by anyone, that's why I mean in the e-book application form. People who think that in book form make them feel sleepy even dizzy this e-book is the answer. So there is no in reading a publication especially this one. You can find actually looking for. It should be here for you. So , don't miss that! Just read this e-book type for your better life and knowledge.

Robert Higby:

Do you like reading a book? Confuse to looking for your favorite book? Or your book seemed to be rare? Why so many question for the book? But any kind of people feel that they enjoy with regard to reading. Some people likes examining, not only science book but also novel and Iris Biometric Model for Secured Network Access or perhaps others sources were given knowledge for you. After you know how the truly amazing a book, you feel want to read more and more. Science guide was created for teacher or perhaps

students especially. Those ebooks are helping them to add their knowledge. In additional case, beside science publication, any other book likes Iris Biometric Model for Secured Network Access to make your spare time a lot more colorful. Many types of book like this one.
