

Statistics for People Who (Think They) Hate Statistics: Using Microsoft Excel 2016

By Neil J. Salkind

Statistics for People Who (Think They) Hate Statistics: Using Microsoft Excel 2016 By Neil J. Salkind

Statistics for People Who (Think They) Hate Statistics: Using Microsoft Excel 2016, *Fourth Edition* presents an often intimidating and difficult subject in a way that is clear, informative, and personable. Researchers and students will appreciate the book's unhurried pace and thorough, friendly presentation. Opening with an introduction to Excel 2016, including coverage of how to use functions and formulas, this edition also shows students how to install the Excel Data Analysis Tools option to access a host of useful analytical techniques. The book walks readers through various statistical procedures, beginning with simple descriptive statistics, correlations, and graphical representations of data, and ending with inferential techniques, analysis of variance, and a new introductory chapter on working with large datasets and data mining using Excel.

Editorial Review

Review

Statistics for People who (Think They) Hate Statistics really makes students learn and enjoy statistics and research in general. Students especially like the Ten Commandments and Internet Sites. (Professor Valarie Janesick)

Salkind's book is in a class by itself. It is easily the best book of its kind that I have come across. I enthusiastically recommended it for anyone interested in the subject and even (and especially) for those who aren't! (Russ Shafer-Landau)

Statistics for People who (Think They) Hate Statistics is definitely the right book for people who have to overcome that familiar anxious feeling when opening a standard statistics book and who having finally managed to do so are still not able to make much sense of it all. The book by Salkind is easy and pleasant to read and one that hardly needs any pre-knowledge of the field to be able to follow the author's train of thoughts. Salkind has managed to bring statistics home to people who hate statistics or though they did. (Dr Andrea Winkler *Statistical Methods in Medical Research*)

About the Author

Neil J. Salkind received his PhD from the University of Maryland in Human Development, and after teaching for 35 years at the University of Kansas, he remains as a Professor Emeritus in the Department of Psychology and Research in Education, where he continues to collaborate with colleagues and work with students. His early interests were in the area of children's cognitive development, and after research in the areas of cognitive style and (what was then known as) hyperactivity, he was a postdoctoral fellow at the University of North Carolina's Bush Center for Child and Family Policy. His work then changed direction and the focus was on child and family policy, specifically the impact of alternative forms of public support on various child and family outcomes. He has delivered more than 150 professional papers and presentations; written more than 100 trade and textbooks; and is the author of *Statistics for People Who (Think They) Hate Statistics* (Sage), *Theories of Human Development* (Sage), and *Exploring Research* (Prentice Hall). He has edited several encyclopedias, including the *Encyclopedia of Human Development*, the *Encyclopedia of Measurement and Statistics*, and the recently published *Encyclopedia of Research Design*. He was editor of *Child Development Abstracts and Bibliography* for 13 years and lives in Lawrence, Kansas, where he likes to letterpress print (see <https://sites.google.com/site/bigboypressofks/> for more), read, swim with the Lawrence River City Sharks, bake brownies (see the recipe at http://www.statisticsforpeople.com/The_Brown.html), and poke around old Volvos and old houses
