In many ways, the two fields of victimology and crime prevention have developed along parallel yet separate paths, and the literature on both has been scattered across disciplines as varied as sociology, law and criminology, public health and medicine, political science and public policy, economics, psychology and human services, and others. The **Encyclopedia of Victimology and Crime Prevention** brings together in one authoritative resource the dispersed information and knowledge on both victimology and crime prevention. With nearly 375 entries, this two-volume set moves victimology and crime prevention one step further into recognized scholarly fields whose research informs practice and whose practice informs research.

Key Features

- Provides users with the most authoritative and comprehensive coverage available on victimology and crime prevention
- Presents victimology and crime prevention as their own separate, justifiable disciplines rather than subfields within more established disciplines
- Discusses the status of victims within the criminal justice system, as well as topics of deterring and preventing victimization in the first place and responding to victims' needs
- Offers "anchor essays" written by leading scholars in their respective fields to provide starting points for investigating the more salient victimology and crime prevention topics

Key Themes

- Business Prevention Actions
- Civil Justice System
- Correlates of Victimization
- Courts: Alternative Remedies

- Courts: Law and Justice
- Crime Prevention
- Crime Prevention Partnerships
- Criminal Justice System
- Fear of Crime
- Individual Protection Actions
- Interventions and Intervention Programs for Victim and Offender
- Intrafamilial Offenses
- Legislation and Statutes
- Media and Crime Prevention
- Methodology
- Offenses, Special Topics
- Official Crime Data
- Personal Offenses
- Property Offenses
- Psychological, Mental, and Physical Health Issues
- Residential Community Crime Prevention
- School and Workplace Offenses
- School-Based Crime Prevention
- Services and Treatment for Victims
- Theory
- Victimization Scales and Surveys
- Victimology
- Youth-Focused Crime Prevention

The victimology–crime prevention nexus provides the foundation for a comprehensive and, hopefully, long-lasting approach to addressing the public's risk of being victimized and aids individuals who are targeted by a criminal act. This is a welcome addition to any academic library. The availability in print and electronic formats provides students with convenient, easy access wherever they may be.

Editorial Review

From [Booklist](#)

Although humans have experienced crime since the beginning of history, the ideas of crime prevention (stopping crime before it happens) and victimology (studying and aiding those who have suffered from crime) are relatively new concepts. Other reference works touch on these two fields, but this is the first encyclopedia to focus on victimization and prevention within the broader field of criminal justice. Entries cover a wide array of topics, including methods for preventing crime, the psychology and fear of crime, domestic violence, legislation, school and workplace violence, measurement scales and surveys, and theoretical issues in the field. Entries tend to be academic in nature, covering the theory and research behind each topic. Each entry has a bibliography for further reading. Appendixes provide lists of organizations and government agencies and a time line of historical developments in the field. A "Reader's Guide" serves as a classified index, grouping the entries under 28 general topical headings. Although this is the first comprehensive reference work in these two areas of study and it fills a gap within the broader discipline of criminal justice, its academic nature will make it too specialized for many libraries. Recommended for academic libraries with criminology and criminal justice collections. Also available as an e-book. --David Tyckoson

Review

"...Features some 370 signed articles by leading authorities and practitioners on topics within the separate but complementary fields of victimology and crime prevention....This set will be useful for colleges and universities supporting programs in criminology or law, feminist studies, psychology and human services, political science and public policy, and sociology. It is also offered electronically through SAGE Reference Online. **Summing Up:** Recommended. Lower-level undergraduates and above." (J.J. Harrison *CHOICE* 2010-08-01)

"...The bulk of each entry discusses the crime within the context of its victims and its possible prevention. In addition, there are essays covering different theories of crime and violence as well as those focused on methodologies including a number of victimization scales and surveys.... In short, these two volumes provide readers a well-balanced and thorough reference that lends clarity to both disciplines while at the same time showing their complimentary nature. Undergraduate students are an obvious audience for this reference, and academic libraries would do well to consider it. However, it will also be a valuable resource for victim advocacy groups and crime prevention agencies." (Against the Grain 2011-01-01)

"... Plenty of current, accurate titles on both subjects exist, but this is the first work to link crime prevention and victimology overtly in one resource.... **Bottom line** Those studying law enforcement, the judicial system, victim's services, criminal justice, and social services as well as victims caught in the criminal justice system will find this helpful. Purchase where needed." (Laurie Selwyn *Library Journal* 2010-09-15)
