

## Power Programming with RPC (Nutshell Handbooks)

By John Bloomer

**Power Programming with RPC (Nutshell Handbooks)** By John Bloomer

RPC, or remote procedure calling, is the ability to distribute parts of a program to other computers on a network. An RPC facility manages the exchange of data between computers to make remote execution transparent to the user. Distributed applications based on RPC can utilize distributed network resources and increase significantly the computing power brought to bear on complex problems. An RPC facility is the fundamental element of a distributed computing environment. The book builds a working understanding of RPC programming through examples. Sun RPC, the de facto standard on UNIX systems, is covered in detail. Interprocess communication and other related UNIX programming topics are also covered. The standard-issue RPC documentation is difficult to understand and lacks real-world examples. There are, in addition, many techniques to learn. This book, written from a programmer's perspective, shows you what you can do with RPC and presents a framework for learning it. Contents include:

- Foundations of remote procedure calling; what it is, how it works, and which vendors support it.
- What RPC offers to application and product developers. How RPC fits into a distributed computing environment.
- ONC and DCE, a comparison of their similarities and differences.
- How to develop, debug, and deploy networked applications.
- Understanding the interprocess control (IPC) mechanisms on which RPC is based.
- Using remote procedure calling in parallel/distributed processing and scheduling.
- Using remote procedure calling with windowing systems.
- Examples of distributed applications using both single and multiple concurrent servers.

### Editorial Review

From the Publisher

RPC, or remote procedure calling, is the ability to distribute parts of a program to other computers on a network. An RPC facility manages the exchange of data between computers to make remote execution transparent to the user. Distributed applications based on RPC can utilize distributed network resources and increase significantly the computing power brought to bear on complex problems. An RPC facility is the fundamental element of a distributed computing environment. The book builds a working understanding of RPC programming through examples. Sun RPC, the de facto standard on UNIX systems, is covered in detail. Interprocess communication and other related UNIX programming topics are also covered. The standard-issue RPC documentation is difficult to understand and lacks real-world examples. There are, in addition, many techniques to learn. This book, written from a programmer's perspective, shows you what you can do with RPC and presents a framework for learning it. Contents include: Foundations of remote procedure calling; what it is, how it works, and which vendors support it. What RPC offers to application and product developers. How RPC fits into a distributed computing environment. ONC and DCE, a comparison of their similarities and differences. How to develop, debug, and deploy networked applications. Understanding the interprocess control (IPC) mechanisms on which RPC is based. Using remote procedure calling in parallel/distributed processing and scheduling. Using remote procedure calling with windowing systems. Examples of distributed applications using both single and multiple concurrent servers.

About the Author

John Bloomer currently develops network multimedia and imaging applications for GE's Signal and Image Coding R&D group. He has experience designing VLSI chips and design automation tools and has developed hardware and software for graphics and signal processing systems. John often lectures on programming for distributed computing with a second O'Reilly book on DCE RPC underway.

### Users Review

**From reader reviews:**

**Billy Reynolds:**

Have you spare time for any day? What do you do when you have more or little spare time? Yeah, you can choose the suitable activity regarding spend your time. Any person spent their own spare time to take a walk, shopping, or went to the actual Mall. How about open or perhaps read a book allowed Power Programming with RPC (Nutshell Handbooks)? Maybe it is for being best activity for you. You understand beside you can spend your time with the favorite's book, you can cleverer than before. Do you agree with its opinion or you have additional opinion?

**Jennifer McMorris:**

What do you think about book? It is just for students because they are still students or that for all people in

the world, the particular best subject for that? Merely you can be answered for that problem above. Every person has various personality and hobby for every single other. Don't to be pushed someone or something that they don't would like do that. You must know how great and important the book Power Programming with RPC (Nutshell Handbooks). All type of book can you see on many solutions. You can look for the internet options or other social media.

**Natalie Renz:**

What do you concerning book? It is not important along with you? Or just adding material when you need something to explain what your own problem? How about your free time? Or are you busy particular person? If you don't have spare time to accomplish others business, it is make you feel bored faster. And you have free time? What did you do? Every person has many questions above. The doctor has to answer that question because just their can do in which. It said that about publication. Book is familiar on every person. Yes, it is correct. Because start from on kindergarten until university need this particular Power Programming with RPC (Nutshell Handbooks) to read.

**Janice Evans:**

Reading a book to be new life style in this season; every people loves to read a book. When you go through a book you can get a great deal of benefit. When you read textbooks, you can improve your knowledge, due to the fact book has a lot of information on it. The information that you will get depend on what types of book that you have read. If you wish to get information about your examine, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, these kinds of us novel, comics, along with soon. The Power Programming with RPC (Nutshell Handbooks) will give you a new experience in examining a book.
