

The Handbook of Computational Linguistics and Natural Language Processing

From Brand: Wiley-Blackwell

The Handbook of Computational Linguistics and Natural Language Processing From Brand: Wiley-Blackwell

This comprehensive reference work provides an overview of the concepts, methodologies, and applications in computational linguistics and natural language processing (NLP).

- Features contributions by the top researchers in the field, reflecting the work that is driving the discipline forward
- Includes an introduction to the major theoretical issues in these fields, as well as the central engineering applications that the work has produced
- Presents the major developments in an accessible way, explaining the close connection between scientific understanding of the computational properties of natural language and the creation of effective language technologies
- Serves as an invaluable state-of-the-art reference source for computational linguists and software engineers developing NLP applications in industrial research and development labs of software companies

Editorial Review

Review

“The overall evaluation is therefore definitely very good: the work is solid, complete and definitely an important reference for NLP and CL.” (*Linguistlist*, 14 January 2014)

“Altogether, this Handbook covers a wide variety of topics in NLP and CL and, is of particular use to researchers in the field of MT. On a more general note, graduate students or novice researchers can utilise this book as a comprehensive starting point for their area of interest within NLP or CL ... All in all, this is very well compiled book, which effectively balances the width and depth of theories and applications in two very diverse yet closely related fields of language research.” (*Machine Translation*, 18 March 2012)

Review

This Handbook is exceptionally broad and exceptionally deep in its coverage. The contributions, by noted experts, cover all aspects of the field, from fundamental theory to concrete applications. Clark, Fox and Lappin have performed a great service by compiling this volume.

Richard Sproat, Oregon Health & Science University

From the Back Cover

The Handbook of Computational Linguistics and Natural Language Processing provides a comprehensive overview of the concepts, methodologies, and applications being undertaken today in computational linguistics and natural language processing.

The major developments in this dynamic field and a detailed synopsis of the most cutting-edge research are presented in an accessible way that explains the close connection between scientific understanding of the computational properties of natural language and the creation of effective language technologies. The *Handbook* serves as an invaluable state-of-the-art reference source for computational linguists and software engineers developing natural language applications in industrial research and development labs of software companies, as well as for graduate students and researchers in computer science, linguistics, psychology, philosophy, and mathematics, working within computational linguistics.

Users Review

From reader reviews:

Joshua Arwood:

This The Handbook of Computational Linguistics and Natural Language Processing are reliable for you who want to be considered a successful person, why. The main reason of this The Handbook of Computational Linguistics and Natural Language Processing can be one of many great books you must have will be giving you more than just simple reading food but feed an individual with information that probably will shock your previous knowledge. This book is actually handy, you can bring it just about everywhere and whenever your conditions at e-book and printed people. Beside that this The Handbook of Computational Linguistics and

Natural Language Processing forcing you to have an enormous of experience for instance rich vocabulary, giving you demo of critical thinking that we understand it useful in your day pastime. So , let's have it and revel in reading.

Byron Jorgensen:

Reading can called mind hangout, why? Because when you find yourself reading a book especially book entitled The Handbook of Computational Linguistics and Natural Language Processing the mind will drift away trough every dimension, wandering in every aspect that maybe unidentified for but surely will become your mind friends. Imaging each and every word written in a reserve then become one contact form conclusion and explanation that maybe you never get before. The The Handbook of Computational Linguistics and Natural Language Processing giving you a different experience more than blown away your brain but also giving you useful facts for your better life on this era. So now let us demonstrate the relaxing pattern the following is your body and mind will probably be pleased when you are finished reading it, like winning a casino game. Do you want to try this extraordinary shelling out spare time activity?

Carol Wells:

In this period globalization it is important to someone to receive information. The information will make someone to understand the condition of the world. The condition of the world makes the information easier to share. You can find a lot of personal references to get information example: internet, magazine, book, and soon. You can see that now, a lot of publisher this print many kinds of book. The particular book that recommended for you is The Handbook of Computational Linguistics and Natural Language Processing this guide consist a lot of the information of the condition of this world now. This book was represented how does the world has grown up. The words styles that writer make usage of to explain it is easy to understand. Typically the writer made some analysis when he makes this book. Honestly, that is why this book acceptable all of you.

Carl Johnson:

Reading a guide make you to get more knowledge from this. You can take knowledge and information originating from a book. Book is written or printed or highlighted from each source this filled update of news. With this modern era like at this point, many ways to get information are available for anyone. From media social just like newspaper, magazines, science publication, encyclopedia, reference book, novel and comic. You can add your knowledge by that book. Do you want to spend your spare time to spread out your book? Or just searching for the The Handbook of Computational Linguistics and Natural Language Processing when you essential it?
