**Thermosets and Composites, Second Edition: Material Selection, Applications, Manufacturing and Cost Analysis (Plastics Design Library)** By Michel Biron

This book bridges the technology and business aspects of thermosets, providing a practical guide designed for engineers working in real-world industrial settings. The author explores the criteria for material selection, provides information on material properties for each family of thermosets, and discusses the various processing options for each material type. He explains advantages and disadvantages of using thermosets and composites in comparison to competing materials and assesses cost aspects, enabling the reader to balance out technical and economic constraints when choosing a thermoset and processing technology for a given application. This second edition contains a new section on composites solutions for practical problems, gathering information on trends contributing to the breakthrough of composites in various sectors. Other new sections on specific crosslinking processes, processing trends, machinery and equipment manufacturers, applications, bio-sourced thermosets and natural fibers, and recycling of thermosets and composites are included. Case studies are provided, illustrating many design and production challenges. Furthermore, new market data and information about health and safety will be added. All data is fully updated throughout, with pricing in USD and EUR, and both ASTM (North American) and European standards. *Thermosets and Thermoset Composites, Second Edition* is the only book that gives in-depth coverage of a wide range of subject matters and markets, yet in brevity and concision in a single volume, avoiding the need of consulting a series of other specialized books. By providing the knowledge necessary for selecting a fabrication process, thermoset material and methods for determining the all important cost of thermoset parts this new edition is an invaluable decision-making aid and reference work for practitioners in a field with growing importance.

- Combining materials data, information on processing techniques, and economic aspects, Biron provides a unique end-to-end approach to the selection and use of materials in the plastics industry and related sectors
- New material on bio-sourced thermosets, natural fibers, and recycling of thermosets

- Concise and easy-to-use source of information and decision-making aid

### Editorial Review

Review

*"It provides insight into technical, logistics, suppliers, and financial...information...It will be a very handy reference book for those involved in molding, thermoset processing, and thermoset material selection."--IEEE Electrical Insulation Magazine, Thermosets and Composites, Second Edition*

*This book is of value to someone already involved deeply in thermosets and composites looking for 'nuggets of gold'. Eli M. Pearce H. F. Mark Polymer Research Institute Polytechnic University Brooklyn NY USA*

About the Author

Michel Biron is a plastics consultant based in Les Ulis, France, and is a Graduate Chemist Engineer from the Institut National Supérieur de Chimie Industrielle

de Rouen and Polymer Specialist from the Institut Français du Caoutchouc. He has authored numerous technical papers and books on plastics.

### Users Review

**From reader reviews:**

**Lucia Morrone:**

This Thermosets and Composites, Second Edition: Material Selection, Applications, Manufacturing and Cost Analysis (Plastics Design Library) book is not really ordinary book, you have it then the world is in your hands. The benefit you will get by reading this book will be information inside this e-book incredible fresh, you will get information which is getting deeper you read a lot of information you will get. This specific Thermosets and Composites, Second Edition: Material Selection, Applications, Manufacturing and Cost Analysis (Plastics Design Library) without we understand teach the one who reading it become critical in contemplating and analyzing. Don't be worry Thermosets and Composites, Second Edition: Material Selection, Applications, Manufacturing and Cost Analysis (Plastics Design Library) can bring when you are and not make your bag space or bookshelves' come to be full because you can have it within your lovely laptop even phone. This Thermosets and Composites, Second Edition: Material Selection, Applications, Manufacturing and Cost Analysis (Plastics Design Library) having excellent arrangement in word and layout, so you will not experience uninterested in reading.

**John Masterson:**

Information is provisions for anyone to get better life, information currently can get by anyone from everywhere. The information can be a information or any news even a huge concern. What people must be consider any time those information which is within the former life are challenging be find than now is taking seriously which one is suitable to believe or which one typically the resource are convinced. If you have the unstable resource then you obtain it as your main information you will see huge disadvantage for

you. All of those possibilities will not happen inside you if you take Thermosets and Composites, Second Edition: Material Selection, Applications, Manufacturing and Cost Analysis (Plastics Design Library) as your daily resource information.

**Wayne Kong:**

Reading a book to become new life style in this 12 months; every people loves to go through a book. When you examine a book you can get a lots of benefit. When you read textbooks, you can improve your knowledge, mainly because book has a lot of information onto it. The information that you will get depend on what sorts of book that you have read. If you need to get information about your research, you can read education books, but if you act like you want to entertain yourself you are able to a fiction books, these kinds of us novel, comics, in addition to soon. The Thermosets and Composites, Second Edition: Material Selection, Applications, Manufacturing and Cost Analysis (Plastics Design Library) provide you with a new experience in examining a book.

**Faye Bolin:**

What is your hobby? Have you heard in which question when you got pupils? We believe that that issue was given by teacher for their students. Many kinds of hobby, Everybody has different hobby. And you also know that little person like reading or as looking at become their hobby. You must know that reading is very important and also book as to be the matter. Book is important thing to increase you knowledge, except your current teacher or lecturer. You find good news or update with regards to something by book. Many kinds of books that can you go onto be your object. One of them is niagra Thermosets and Composites, Second Edition: Material Selection, Applications, Manufacturing and Cost Analysis (Plastics Design Library).
