Project Scheduling: A Research Handbook (International Series in Operations Research & Management Science) By Erik Leuven Demeulemeester, Willy S. Herroelen

Our objectives in writing **Project Scheduling: A Research Handbook** are threefold: (1) Provide a unified scheme for classifying the numerous project scheduling problems occurring in practice and studied in the literature; (2) Provide a unified and up-to-date treatment of the state-of-the-art procedures developed for their solution; (3) Alert the reader to various important problems that are still in need of considerable research effort.

Project Scheduling: A Research Handbook has been divided into four parts. Part I consists of three chapters on the scope and relevance of project scheduling, on the nature of project scheduling, and finally on the introduction of a unified scheme that will be used in subsequent chapters for the identification and classification of the project scheduling problems studied in this book. Part II focuses on the time analysis of project networks. Part III carries the discussion further into the crucial topic of scheduling under scarce resources. Part IV deals with robust scheduling and stochastic scheduling issues. Numerous tables and figures are used throughout the book to enhance the clarity and effectiveness of the discussions. For the interested and motivated reader, the problems at the end of each chapter should be considered as an integral part of the presentation.

Editorial Review

Review

From the reviews:

"In this book the authors give a survey about the current research in the area of project scheduling. A large number of state-of-the-art algorithms (exact and heuristic solution procedures) are described for different project scheduling problems and illustrated with examples and computational results. Furthermore, the book contains exercises in each chapter and a huge number of literature references." (Sigrid Knust, Zentralblatt MATH, Vol. 1059 (10), 2005)

Users Review

From reader reviews:

Louise Wax:

What do you concerning book? It is not important together with you? Or just adding material when you need something to explain what the one you have problem? How about your free time? Or are you busy particular person? If you don't have spare time to try and do others business, it is make you feel bored faster. And you have spare time? What did you do? All people has many questions above. They have to answer that question due to the fact just their can do which. It said that about guide. Book is familiar on every person. Yes, it is correct. Because start from on pre-school until university need this Project Scheduling: A Research Handbook (International Series in Operations Research & Management Science) to read.

Clara Reece:

As people who live in often the modest era should be revise about what going on or facts even knowledge to make these people keep up with the era which can be always change and progress. Some of you maybe will update themselves by reading books. It is a good choice in your case but the problems coming to anyone is you don't know what kind you should start with. This Project Scheduling: A Research Handbook (International Series in Operations Research & Management Science) is our recommendation to help you keep up with the world. Why, because this book serves what you want and need in this era.

Amy Joshi:

Typically the book Project Scheduling: A Research Handbook (International Series in Operations Research & Management Science) has a lot details on it. So when you check out this book you can get a lot of help. The book was authored by the very famous author. The author makes some research ahead of write this book. This book very easy to read you can get the point easily after reading this book.

Corey Cook:

Many people spending their time period by playing outside together with friends, fun activity together with family or just watching TV 24 hours a day. You can have new activity to pay your whole day by reading a book. Ugh, think reading a book really can hard because you have to use the book everywhere? It fine you can have the e-book, having everywhere you want in your Touch screen phone. Like Project Scheduling: A Research Handbook (International Series in Operations Research & Management Science) which is obtaining the e-book version. So , try out this book? Let's notice.
