

Hypothyroidism Type 2: The Epidemic

By Mark Starr

Hypothyroidism Type 2: The Epidemic By Mark Starr

An astonishing book revealing the cause and successful treatment for the plague of illnesses affecting western civilization; including obesity, heart attacks, depression, diabetes, strokes, headaches, chronic fatigue, and many more.

In Dr. Starr's description of Type 2 Hypothyroidism, he presents overwhelming evidence showing a majority of Americans suffer this illness, which is due to environmental and hereditary factors. Laboratory testing used to diagnose hypothyroidism is completely inadequate, and current treatment for hypothyroidism is ineffective. Groundbreaking research shows how persistent environmental toxins prevent thyroid and other hormones from working properly. This book will lead you to understanding more about your health than anything you have ever read.

Many of the more recent patients who have sought help from Dr. Starr have come to him with Hashimoto's and Graves' diseases. As a result, the updated 2011 version added a chapter on Hashimoto's and Graves' disease.

Revised for 2013 with a contribution by Jerry Tennant, M.D.

Editorial Review

Review

Dr. Starr has written clear and understandable explanation of why so many people today are suffering from hypothyroidism, despite normal blood test that throw their doctors off the track. Having successfully treated several thousand type 2 hypothyroid patients myself over 23 years practice and watching them return to normal health, I applaud Dr. Starr s work which will hopefully reach many of those who are suffering so they can get help. His in-depth research and discussion of how environmental toxins can interfere with thyroid hormones is groundbreaking and enlightening for us all. Bravo Mark! --Robban Sica, M.D.

I believe everyone needs to review Mark Starr s book. He has a vital message to share about the many people who do not realize they have low thyroid, because standard thyroid tests do not show it. Mark Starr s dedication to research, and his devoted study with the old masters, have made him an international expert on thyroid and iodine. ---- Garry Gordon, M.D., D.O., M.D.(H)

About the Author

As a Diplomat of the American Board of Pain Medicine and Fellow of the American Board of Physical Medicine and Rehabilitation, Dr. Starr delivered lectures at International Courses on Musculoskeletal Pain and Fibromyalgia. The courses were held at Mt. Sinai Hospital and University of British Columbia, Vancouver, British Columbia. He is a life member of the national registry of Who's Who published in the 1999 edition. Dr. Mark Starr finished his residency in Physical Medicine and Rehabilitation at the University of Missouri, Rusk Rehabilitation Center in 1994. The following two years, he studied in New York City with several of the world's premier pain specialists: Hans Kraus, MD, Norman Marcus, MD. Lawrence Sonkin, MD, PhD, and Andrew A Fischer, MD, PhD. Initially, Dr. Starr worked eighteen months at the Bronx Veteran's Hospital with Dr. Fischer, the renowned musculoskeletal pain specialist, author, lecturer, and former student of Hans Kraus. Following his work with Dr. Fischer, Dr. Starr studied at the New York Pain Treatment Program at Lenox Hill Hospital, with Drs. Kraus and Marcus. Dr. Starr was treated by and studied under Dr. Sonkin, the New York Cornell Endocrinologist, who worked closely with Dr. Kraus for thirty years. Dr. Kraus' books included Therapeutic Exercise, Backache, Stress, and Tension, The Sports Injury Handbook, and Diagnosis and Treatment of Muscle Pain. Dr. Starr has been in private practice since 1996. He has attended American Academy of Anti-aging Meetings & American Academy of Environmental Medicine meetings. Dr. Starr is involved in clinical studies on the relationship and treatment of hormone

imbalances, heavy metal toxicity, Candidiasis, chemical sensitivities, chronic fatigue, and pain. He is adept at maximizing health through natural hormone therapies.

Users Review

From reader reviews:

Charles Anthony:

Book is usually written, printed, or illustrated for everything. You can realize everything you want by a book. Book has a different type. As we know that book is important point to bring us around the world. Adjacent to that you can your reading talent was fluently. A reserve Hypothyroidism Type 2: The Epidemic will make you to become smarter. You can feel far more confidence if you can know about anything. But some of you think in which open or reading a new book make you bored. It is far from make you fun. Why they might be thought like that? Have you trying to find best book or suitable book with you?

Mary McDonald:

Hypothyroidism Type 2: The Epidemic can be one of your basic books that are good idea. Many of us recommend that straight away because this publication has good vocabulary that could increase your knowledge in terminology, easy to understand, bit entertaining but nevertheless delivering the information. The writer giving his/her effort that will put every word into enjoyment arrangement in writing Hypothyroidism Type 2: The Epidemic but doesn't forget the main level, giving the reader the hottest along with based confirm resource data that maybe you can be certainly one of it. This great information could drawn you into completely new stage of crucial thinking.

Katherine Wilcoxon:

Is it you who having spare time and then spend it whole day by simply watching television programs or just telling lies on the bed? Do you need something new? This Hypothyroidism Type 2: The Epidemic can be the solution, oh how comes? It's a book you know. You are and so out of date, spending your extra time by reading in this brand-new era is common not a geek activity. So what these ebooks have than the others?

Jamie Wallace:

As a student exactly feel bored to help reading. If their teacher asked them to go to the library in order to make summary for some guide, they are complained. Just tiny students that has reading's heart or real their passion. They just do what the trainer want, like asked to go to the library. They go to there but nothing reading very seriously. Any students feel that looking at is not important, boring in addition to can't see colorful pictures on there. Yeah, it is for being complicated. Book is very important to suit your needs. As we know that on this time, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. Therefore this Hypothyroidism Type 2: The Epidemic can make you feel more interested to read.
