Editorial Review

From School Library Journal

Grade 1-3—These compelling but slightly flawed books build short narratives around data on various unenviable records. *Coldest*, for example, invites readers to imagine living in a freezer, briefly explains the reasons for the temperature of some places, and then gets to the meat of the books: seven spreads covering the world's most frigid environs, such as Mount McKinley (whose exact location is unfortunately not provided); and Yakutsk, Russia, the world's coldest city. The texts are supplemented by sometimes banal Extreme Fact sidebars; by world maps (which lack country borders) pinpointing the extreme places; and by large, clear photographs. Glossary words are defined on the page on which they are used, a helpful feature. (c) Copyright 2010. Library Journals LLC, a wholly owned subsidiary of Media Source, Inc.
